CLIMATE ACTION FOR BUSINESS

ABOUT THE EVENT

Business in the Community (BITC) is working with Be the Business and supported by Scottish Enterprise to create four interactive workshops to help SMEs with operations in Scotland to create a climate action plan.

The four workshops are complemented by mentored sessions by a business leader to support them progress in their climate action plans.

The workshops are focused to support businesses:

- measure their carbon footprint
- reduce their emissions
- succeed in the net zero future

THE WORKSHOPS

Each workshop builds on knowledge and guides businesses through practical steps – from understanding why action is necessary, to developing a climate action plan and getting to grips with SME's carbon footprint.

Businesses will discover how to overcome the challenges that every business faces and learn how to bring customers and suppliers on board their climate action journey.

Every participant is also invited to join mentor-led follow up practical sessions which complement the four interactive workshops – an unmissable opportunity to discuss ideas, get support, and start putting climate action plans into practice.

LIMITED PLACES

There are only a number of limited funded places available so booking is essential. The programme is free of charge and only available to businesses with operations in Scotland.
