Climate adaptation tips for businesses

- Raise awareness in your workforce of the need for adaptation and actions needed.

- Understand the risk to your premises and business of extreme heat and heatwaves and plan accordingly e.g. better ventilation and shading in buildings.

  Complete a climate risk assessment to identify the potential risks climate change may have on the bushiness and identify priority areas.

- Understand your flood risk and plan how to mitigate impacts on your people, premises and surrounding areas.

- Replace reliance on 'grey' infrastructure by using nature-based solutions
